Managing Natural Resource Pathways Planning Is Everything!

In natural resource work, equipment and organisms are often moved from one location to another. The specific equipment or organism being moved is called the target. Targets could include

HACCP Planning Wizard 2.01

Now available!

Appropriate planning for species collections, relocations, equipment transfers and other natural resource work prevents spread of hitchhiking species through these pathways.

Utilización de HACCP para el manejo de riesgos de especies invasoras

HACCP Planning Wizard Ver. 2.01 (New Version!)

Developed by David K. Britton, USFWS, for Natural Resource Managers

The HACCP Wizard is Windows program designed to simplify the process of creating HACCP documents. HACCP stands for Hazard Analysis and Critical Control Points, and this wizard helps natural resource managers identify critical control points in their activities and create a HACCP document using standard 5-page HACCP forms. The wizard walks you through the HACCP planning process by asking you to answer simple questions about your activities. The wizard guides you through the control point analysis and gathers all of the information necessary to complete a HACCP document. When finished, the wizard transfers this information to Microsoft Word, creating a complete HACCP document for you.
