Report of Pesticide use Pursuant to Generic Permit #FLG510039-IWPG Pollutant Discharges to Surface Waters of the State from the Application of Pesticides January 1, 2023 - December 31, 2023.

The Florida Fish and Wildlife Conservation Commission (FWC) is the lead agency directing the control of the aquatic plants in Florida waters. There are several chemical herbicide compounds registered for use by the U.S. Environmental Protection Agency (EPA) and the Florida Department of Agriculture and Consumer Services (DACS) for use in Florida waters that were used to manage aquatic plants during 2023. These compounds are formulated and sold under numerous different trade names. They are applied directly to the target plant or dispersed within the water for the purpose of managing aquatic plants to conserve the uses or functions of the waterbody.

Table 1 lists classes of pesticides and identifies 44 trade names of the compounds that were applied to control aquatic plants under contract with the Florida Fish and Wildlife Conservation Commission (FWC) in Florida waters during 2023. Additionally, the EPA registration number is provided along with the amount of active component contained in each compound as provided on the EPA product label. In most cases, the EPA label lists pounds of active ingredient (ai) contained in each gallon of liquid formulation or a percent of the weight of solid formulation herbicides. However, most imazapyr, triclopyr, and 2,4-D labels only provide the amount of acid equivalent (ae) available for the compound. Most EPA labels for copper compounds provide only the amount of elemental copper (el) contained in the product. Therefore, the active component of these compounds applied to Florida waters is listed in pounds of acid equivalent or pounds of elemental copper.

FWC contracts aquatic plant management activities with government agencies and private for-hire companies. Table 2 lists pounds of herbicide active component applied to individual waterbodies to manage aquatic plants within the State of Florida by applicator entity. The contact information for each applicator entity listed on Table 2 is listed in Appendix 1. Information for individual herbicide application is on file with FWC and is available upon request. Target plants are identified for each waterbody in which they were controlled along with the pounds of herbicide active component applied to achieve control. Annual workplans including acreage of target plants estimated for control and control methods are authorized by FWC prior to any pesticide application. The authorization process to apply pesticides to Florida waters and a list of all Florida waters eligible for aquatic plant control under contract with FWC is described in the FWC PDMP.

Additionally, FWC staff makes occasional applications of the pesticide rotenone to Florida waters for the control of aquatic nuisance animals (invasive fish species). FWC did not apply rotenone to Florida waters in 2023. FWC staff also uses compounds to control invasive aquatic invertebrates. FWC applied 0.016 gallons of pyrethrin active ingredient to roadside ditch pools in Clay County in 2023. The application is recorded at the end of Table 1 under pyrethrin and in Table 2 under Clay County roadside ditch pools. The pyrethrin was dispersed under authorization from the EPA via experimental use permit exemption.

There were no adverse incidents to report related to pesticide applications for aquatic plant control operations or aquatic nuisance animal control in 2023 and therefore, no corrective actions were necessary.

Table 1. Summary of Active Component Listed by Class, Trade Name, and EPA Registration Number Applied by FWC Contractors to Florida Waters in 2023.

Herbicide Formulation	Trade Name	EPA Registration Number	Amount Applied	Unit	Measure	Active Applied

Key	Description
Waterbody	Name of waterbody in which plants were treated with herbicides / pesticides
FMA	Fish Management Area
WMA	Wildlife Management Area
County	County in which the water body lies (Note: many water bodies lie in more than one county, for example: the St. John's River lies in 11 counties, but for convenience has been assigned to St. Johns County)
Water Acres	Surface acres of waterbody in which herbicides / pesticides were applied
Pest Target Plant	Latin name of plants controlled in each water body - Note: floating plants = either Eichhornia crassipes or Pistia stratiotes or both
Applicator Entity	Agency or company under FWC contract to manage aquatic plants. See Appendix 1 for applicator entity contact information.
AHRE	FWC Aquatic Habitat and Restoration / Enhancement Section
Applied Aquatic	Applied Aquatic Management, Inc.
AVC	Aquatic Vegetation Control, Inc.
Brevard	Brevard County
Citrus	Citrus County
Coastal Air	Coastal Air Service, Inc.
FL Environmental	Florida Environmental Consultants, Inc.
FWC Fisheries	FWC Division of Freshwater Fisheries
FWC-IPM	FWC Invasive Plant Management Section
FWC-WIM	FWC Wildlife Impact Management Section
Highlands	Highlands County
Lake	Lake County
Orange	Orange County
Palm Beach	Palm Beach County

Key	Description
Polk	Polk County
SFWMD	South Florida Water Management District
SJRWMD	St. Johns River Water Management District
SWFWMD	Southwest Florida Water Management District
USCOE	United States Army Corps of Engineers
Winter Park	City of Winter Park
Pesticide Trade Name	Herbicide or pesticide product name applied to the treatment area
EPA Reg. No.	U.S. EPA registration number for the herbicide / pesticide applied
Amount Applied	Number of herbicide / pesticide units applied to the treatment area
Unit	Pounds or gallons of herbicide / pesticide applied
Measure - ai / ae / el	Expression of the pesticide active component on the EPA-approved label: ai= active ingredient; ae= acid equivalent; el= elemental (copper)
Lbs. Active Applied	Pounds of the active component applied to the waterbody

Table 2. Pesticides Applied to Florida Waters under Contract with FWC.
